

Hazardous Chemical Risk Assessment Form

Hazardous Chemical:	Glitz Spray On Wipe Off										
How Used:	Sprayed from a bottle										
Location (Used):					Used By:		01	/06/	2028		
Frequency / duration of use:	Several times per week Quantities				Quantities used:						
		Toxic					Sensitiser (allergic		r resp	irator	y reaction)
N					Carcinogenic (can						
Nature of Hazard:	= +	Harmful Irritant					Mutagenic (mutat Feratogenic (birth		c char	nge)	
	☑ Irritant ☐ Teratogenic (I ☐ Other hazard/s (specify):					reratogeriic (bii tii	ueiects)				
Monitoring						Coul	d cause injury to/	or via:			
Health surveillance is required?			Yes		No		Eyes			Skin	
<u> </u>				\vdash			Inhalation				estion
Air monitoring program required?			Yes		No		Injection			Swa	llowing
What Control Measures Are in Plac	or P	ropose	٨					Prese	nt -		Recommended
		ropose	 								
Isolation (acids, strong oxidising agent Fume cupboard	>)										
·											
General ventilation Natural ventilation											
Other engineering controls											
Safe work methods (e.g., pumping inst								_			
Reduce quantity and/or concentration	(see SI	OS, secti	on 7)								
Information (at least SDS and label)											
Ongoing training (hazards, safe use, PF	E, heal	th surve	illance i	f appl	licable)						
Personal protective equipment (list):											
- Safety glasses with side shie		_	ogles								\boxtimes
Elbow-length safety gloves (Safety boots	Kubber	/PVC)									
First aid supplies/equipment: eyewash	faciliti	20									$oxed{\boxtimes}$
First aid training	raciiiti										
Evacuation plan, emergency plan and	auinm	ent real	iired								
Other controls (specify)	Equipin	ent requ	aneu.							<u>_</u>	
Other controls (specify)											Ш
Outcomes							Action require	ed to reduce	risks	:	
_	t likaly t	o incres	150					check adequacy of controls and whether any exposure			
Risks not significant now and not likely to increase						routes are at risk) No Yes (specify):					
Risks significant but effectively controlled at the moment Risks significant and not adequately controlled at the moment					U No	L Y	'es (s	pecity):		
Uncertain about risks; more deta					11.						
Officertain about risks, more deta	alleu as	sessinei	it requii	eu							
Carried Out By:											
		Cian	2+11501						\ata.		AC /00 /202E
Print Name: Lily Pickersgill		Signa	ature:		7		/	L	ate:		26/08/2025

Hazardous Chemical Risk Assessment Form

Likelihood	Criteria
Rare - 1	The event may occur only in exceptional circumstances
Unlikely - 2	Could occur at some time / the event is not expected to occur
Moderate -3	The event may occur
Likely -4	Likely to occur at some time / the event will probably occur
Almost Certain - 5	Has or likely to occur weekly.

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

		1 Insign.	2 Minor	3 Mod.	4 Major	5 Extreme
Likelihood	1 Rare	1	2	3	4	5
	2 Unlikely	2	4	6	8	10
	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls				
Eliminate	Can we eliminate or remove the hazard completely?			
Substitute	Can we substitute the hazard with something else less dangerous?			
Engineer / Isolation	Can we re-design or isolate the hazard completely?			
Administration	What controls can we put in place, e.g., training, job rotation, supervision?			
PPE	What personal protective equipment is required to undertake this activity?			

Document No.:	SMS-F-04	Version: 1	Uncontrolled if printed	Page 2 of 2
