

Hazardous Chemical Risk Assessment Form

Hazardous Chemi	cal:	INTUMESCENT MASTIC - KILARGO											
How Used:		Fire resistant joint sealant											
Location (Used):		Throughout site Used By:					Used By:		10	/07/	′2028		
Frequency / durat	tion of use:	As required Quant				Quantities used	ities used:						
										gic- type skin or respiratory reaction)			
									rcinogenic (cancer) utagenic (mutations/ genetic change)				
Nature of Hazard:								-				nge)	
	☐ Irritant ☐ Teratogenic (birth☐ Other hazard/s (specify):							derect	3)				
						,,							
Monitoring							_	_	cause injury to/	or via:			
Health surveilland	ce is required?			Yes		No] i	Eyes			Skir	
Air monitoring pro	ogram required?			Yes		No	<u> </u>	<u> </u> 	Inhalation Injection				estion allowing
What Control M	leasures Are in Pla	ce or Pro	nose	4							Present		Recommended
Isolation (see SDS		ce or Fro	pose	<u>u</u>									⊠
Fume cupboard	, 30000177												
General ventilatio	nn												$oxed{\square}$
Natural ventilation													$oxed{\boxtimes}$
Other engineering													П
	ds (e.g., pumping ins	tead of po	uring)									П
	and/or concentration			,									$oxed{\boxtimes}$
Information (at least SDS and label)													
· · · · · · · · · · · · · · · · · · ·		PE, health	surve	illance i	if appl	icable)							
Ongoing training (hazards, safe use, PPE, health surveillance if applicable) Personal protective equipment (list):													
- Safety g	glasses with side shie	lds/Chem	ical go	oggles									
- Safety g	gloves (e.g., lightweig	ght rubber	glove	es)									
- Overalls					\boxtimes								
- Barrier													
	s adequate under no				ons. If	risk of	overe	expo	sure exists;				
<u> </u>	tor (see SDS for reco)									\square
First aid supplies/equipment (e.g., eyewash unit)													
	amarganay plan and	aquinman	t rogu	uirad									
Evacuation plan, emergency plan and equipment req				quirea.									
Other controls (specify)													
Outcomes									Action requir				ther any average
TXT RISKS NOT SIGNITICANT NOW AND NOT LIKELY TO INCREASE					check adequacy of controls and whether any exposure routes are at risk)								
Risks significant but effectively controlled at the moment					☐ No		Yes (s	pecify	<i>(</i>):				
Risks significant and not adequately controlled at the moment													
Uncertain about risks; more detailed assessment required													
Carried Out By	/:

Hazardous Chemical Risk Assessment Form

Likelihood	Criteria			
Rare - 1	The event may occur only in exceptional circumstances			
Unlikely - 2	Could occur at some time / the event is not expected to occur			
Moderate -3	The event may occur			
Likely -4	Likely to occur at some time / the event will probably occur			
Almost Certain - 5	Has or likely to occur weekly.			

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Risk Levels

Low ((1-3)
-------	-------

Works shall be monitored by supervisor.

Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable

Medium (4 – 8)

Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate

High (9 – 14)

No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate

Extreme (15 – 20)

No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls						
Eliminate	Can we eliminate or remove the hazard completely?					
Substitute	Can we substitute the hazard with something else less dangerous?					
Engineer / Isolation	Can we re-design or isolate the hazard completely?					
Administration	What controls can we put in place, e.g., training, job rotation, supervision?					
PPE	What personal protective equipment is required to undertake this activity?					

Document No.: SMS-F-04 Version: 1 Uncontrolled if printed Page 2 of 2
