

Hazardous Chemical:	PROMASEAL GRAFITEX GRA	PROMASEAL GRAFITEX GRAF 4T PROMAT					
How Used:	Applied with gun	Applied with gun					
Location (Used):	Fire Rating		Used By:	16/06/2026			
Frequency / duration of use:	Monthly <15mins in total		Quantities used:				
	Toxic		Sensitiser (allergic- type skin or respiratory reaction)				
	Corrosive		Carcinogenic (cancer)				
Nature of Hazard:	🔲 Harmful 🗌		Mutagenic (mutations/ genetic change)				
	□ Irritant □		Teratogenic (birth defects)				
	Other hazard/s (specify):						

Monitoring				Could cause injury to/or via:				
		Vaa		No	\square	Eyes	\square	Skin
Health surveillance is required?		Yes		INO	\square	Inhalation	\square	Ingestion
Air monitoring program required?		Yes		No	\square	Injection	\square	Swallowing

What Control Measures Are in Place or Proposed	Present	Recommended
Isolation		
Fume cupboard		
General ventilation		\boxtimes
Natural ventilation		
Other engineering controls		
Safe work methods (e.g., pumping instead of pouring)		
Reduce quantity and/or concentration		
Information (at least SDS and label)		\boxtimes
Ongoing training (hazards, safe use, PPE, health surveillance if applicable)		
Personal protective equipment (list):		
- Safety glasses with side shields/Chemical goggles		\boxtimes
- Safety gloves (e.g., PVC/Rubber)		
First aid supplies/equipment (e.g., safety shower)		
First aid training		
Evacuation plan, emergency plan and equipment required.		
Other controls (specify)		

Out	comes	Action required to reduce risks:		
Risks not significant now and not likely to increase		check adequacy of controls and whether any exposure routes are at risk)		
	Risks significant but effectively controlled at the moment	🗌 No		Yes (specify):
	Risks significant and not adequately controlled at the moment			
	Uncertain about risks; more detailed assessment required

Hazardous Chemical Risk Assessment Form

design | install | maintain

Likelihood	Criteria
Rare - 1	The event may occur only in exceptional circumstances
Unlikely - 2	Could occur at some time / the event is not expected to occur
Moderate -3	The event may occur
Likely -4	Likely to occur at some time / the event will probably occur
Almost Certain - 5	Has or likely to occur weekly.

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

		1	2	3	4	5
		Insign.	Minor	Mod.	Major	Extreme
	1 Rare	1	2	3	4	5
bo	2 Unlikely	2	4	6	8	10
Likelihood	3 Moderate	3	6	9	12	15
Lik	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

Risk Levels

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower- level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls				
Eliminate	Can we eliminate or remove the hazard completely?			
Substitute	Can we substitute the hazard with something else less dangerous?			
Engineer / Isolation	Can we re-design or isolate the hazard completely?			
Administration	What controls can we put in place, e.g., training, job rotation, supervision?			
PPE	What personal protective equipment is required to undertake this activity?
