

Hazardous Chemical Risk Assessment Form

			_								
Hazardous Chemica	al:	Roof & Gutter Silicone Bostik									
How Used:		Applied with applicator									
Location (Used):		All are	eas					Used By:		01/09	/2026
Frequency / duration	on of use:	Interm	ittent c	laily				Quantities used	:		
						r (allergic- type skin or respiratory reaction)					
			orrosiv					Carcinogenic (can			
Nature of Hazard:		=	larmful				<u> </u>		lutagenic (mutations/ genetic change)		
			ritant Other h	azard/s	(speci	fv):	<u> </u>	Teratogenic (birth	i derects)		
				aza. a, o	(0)000.	.,,.					
Monitoring							Co	uld cause injury to/	or via:		
Health surveillance	is required?			Yes		No		Eyes		Ski	n
							<u> </u>	Inhalation			gestion
Air monitoring prog	gram required?			Yes	Ш	No		Injection		∐ Sw	allowing
What Control Ma	assuras Ara in Dla	oo or Dr	0000	<u>ا</u>					Prese	nt	Basammandad
	easures Are in Plac	ce or Pr	opose	u						nι	Recommended 🖂
Isolation (see SDS,	section 10)										
Fume cupboard											
General ventilation											
Natural ventilation											
Other engineering											
	s (e.g., pumping inst		ouring)							
	nd/or concentration)									
Information (at leas											
	nazards, safe use, Pf	PE, healt	h surve	illance i	f appl	icable)					
Personal protective											
- Safety glasses with side-shields/Chemical goggles											
	oves (e.g., Nirtile/Bu protective clothing		er)								
	quipment (e.g., saf e		10r 011	owach c	tation	•)					
	quipinient (e.g., sait	ety silow	vei, ey	ewasiis	ialioi	1)					
First aid training	marganay plan and	aquinma	nt roa	uirad							
	mergency plan and	equipme	ent req	uirea.							
Other controls (spe	еспуј								Ш		Ц
Outcomes								Action require	ed to reduce i	risks:	
_	ificant navy and na	به براجران د						-	check adequacy of controls and whether any exposure		
	nificant now and no							routes are at	routes are at risk)		
Risks significant but effectively controlled at the moment						☐ No	☐ Ye	es (specif	y):		
Risks significant and not adequately controlled at the moment											
Uncertain about risks; more detailed assessment required

Hazardous Chemical Risk Assessment Form

Likelihood	Criteria			
Rare - 1	The event may occur only in exceptional circumstances			
Unlikely - 2	Could occur at some time / the event is not expected to occur			
Moderate -3	The event may occur			
Likely -4	Likely to occur at some time / the event will probably occur			
Almost Certain - 5	Has or likely to occur weekly.			

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

		1	2	3	4	5
		Insign.	Minor	Mod.	Major	Extreme
Likelihood	1 Rare	1	2	3	4	5
	2 Unlikely	2	4	6	8	10
	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

Risk Levels

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls				
Eliminate	Can we eliminate or remove the hazard completely?			
Substitute	Can we substitute the hazard with something else less dangerous?			
Engineer / Isolation	Can we re-design or isolate the hazard completely?			
Administration	What controls can we put in place, e.g., training, job rotation, supervision?			
PPE	What personal protective equipment is required to undertake this activity?			

Document No.:	SMS-F-04	Version: 1	Uncontrolled if printed	Page 2 of 2
