

## Hazardous Chemical Risk Assessment Form

Hazardous Chemical: White Knights Squirts Bright Green Aerosol											
How Used:	Ар	Applied from an aerosol spray									
Location (Used):	Thr	oughout	Site				Used By:	22/09/2027			
Frequency / duration of u	use: Mo	nthly - <15	mins in	total			Quantities used				
Nature of Hazard:		☐ Corrosive     ☒ Carcinogenic (ca       ☐ Harmful     ☐ Mutagenic (mutagenic (birth))       ☒ Irritant     ☐ Teratogenic (birth)					Carcinogenic (can	tions/ genetic change)			
Monitoring						Col	uld cause injury to/	or via:			
Health surveillance is req	uired?		Yes		No		Eyes	or via.		Skin	
Air monitoring program r	required?		Yes	П	No		Inhalation Injection			_	estion Illowing
7 III 1110111110111110 pr 0-61 am 1			,		.,,		IIIJediidii			0.114	
What Control Measure	es Are in Place o	r Proposed	d					Pres	ent		Recommended
Isolation									)		$\boxtimes$
Fume cupboard									]		
General ventilation									]		
Natural ventilation									]		
Other engineering contro	ols								]		
Safe work methods (e.g.,	pumping instead	of pouring)						П			
Reduce quantity and/or o	concentration (see	SDS, section	on 8)								
Information (at least SDS	and label)									$oxed{\boxtimes}$	
Ongoing training (hazard		ealth surve	illance if	appli	cable)						
Personal protective equipment (list):  - Safety glasses with side-shields/Chemical goggles  - Safety gloves (Butyl rubber/Latex/Neoprene/PVA/Viton/Nitrile rubber)  If risk of overexposure exists;  - Respirator (see SDS, section 8)					)						
First aid supplies/equipm	ent (e.g., <b>safety s</b> l	hower, eye	wash un	it)					]		
First aid training											
Evacuation plan, emerge	ncy plan and equi	pment requ	uired.								
Other controls (specify)		· · · · · ·									
								ı			
Outcomes  Risks not significant							Action require check adequation routes are at	icy of contro risk)	ols and	l whe	ther any exposure
Risks significant but effectively controlled at the moment					□ No		Yes (sp	pecify	r):		
Risks significant and not adequately controlled at the moment											
Uncertain about ris	sks; more detailed	assessmen	it require	ed							
Carried Out By:											
	Anderson	Signa	ature:				A.		Date:	3	30/03/2024
Print Name: Robert	t Anderson	Signa	ature:				ed.		Date:		30/03/2024
Document No.: SMS-F	-04	Version:	1				Uncontrolled if pr	ınted			Page 1 of 2

## Hazardous Chemical Risk Assessment Form

Likelihood	Criteria
Rare - 1	The event may occur only in exceptional circumstances
Unlikely - 2	Could occur at some time / the event is not expected to occur
Moderate -3	The event may occur
Likely -4	Likely to occur at some time / the event will probably occur
Almost Certain - 5	Has or likely to occur weekly.

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

			C0113	equence		
		1	2	3	4	5
		Insign.	Minor	Mod.	Major	Extreme
Likelihood	1 Rare	1	2	3	4	5
	2 Unlikely	2	4	6	8	10
	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

## Risk Levels

## Low (1-3) Medium (4 – 8) High (9 - 14) Extreme (15 – 20) Works shall be monitored by senior Works shall be monitored by supervisor. No works to commence unless otherwise management. Any risk assessed as Any risk assessed as presenting a low risk approved by Senior Management. Any risk Any risk assessed presenting extreme presenting high or medium risk level will level will be permitted to be controlled assessed as presenting high or medium only be allowed to be controlled using a risk level will only be allowed to be using a combination of controls as risk level will only be allowed to be combination of at least one engineering appropriate, more than one lower-level controlled using a combination of at least control and one lower-level controls as engineering controls as the primary control must be applied if elimination and one engineering control and one lowersource of controls. The activity MUST or engineering controls are not practicable appropriate level controls as appropriate be signed off by director or project manager before proceeding

Hierarchy of Controls					
Eliminate	Can we eliminate or remove the hazard completely?				
Substitute	Can we substitute the hazard with something else less dangerous?				
Engineer / Isolation	Can we re-design or isolate the hazard completely?				
Administration	What controls can we put in place, e.g., training, job rotation, supervision?				
PPE	What personal protective equipment is required to undertake this activity?				

Document No.:	SMS-F-04	Version: 1	Uncontrolled if printed	Page 2 of 2
