

Hazardous Chemical Risk Assessment Form

Page 1 of 2

Hazardous Chemical:	White Knights Squirts Flat Black Aerosol							
How Used:	Applied from an aerosol spray							
Location (Used):	Throughout Site Used By:			20/12/2028				
Frequency / duration of use:	Monthly - <15 mins in tota	al		Quantities used				
	Toxic			Sensitiser (allergio	- type skin or	respi	ratory reaction)	
	Corrosive			Carcinogenic (can	- , , ,			
Nature of Hazard:	☐ Harmful ☐ Irritant		井		Nutagenic (mutations/ genetic change) eratogenic (birth defects)			
	Other hazard/s (sne	cify). Ext	reme			d cont	ainer: may hurst if	
	heated.	onyj. Ex	il Cilic	y mammable deless	31. 1 1 C33 G113 C	a com	amer. may barsen	
Monitoring			Со	uld cause injury to/	or via:			
Health surveillance is required?	☐ Yes ☐	No		Eyes			Skin	
				Inhalation			Ingestion	
Air monitoring program required?	L Yes L	No		Injection			Swallowing	
What Control Massures Are in Dia	as ar Dranasad				Dross	n+	Decemmended	
What Control Measures Are in Pla	ce or Proposed				Prese	ent	Recommended	
Isolation (see SDS, section 10)								
Fume cupboard								
General ventilation								
Natural ventilation								
Other engineering controls					_			
Safe work methods (e.g., pumping ins								
Reduce quantity and/or concentration	n (see SDS, section 8)							
Information (at least SDS and label)								
Ongoing training (hazards, safe use, P	PE, health surveillance if app	plicable)						
Personal protective equipment (list):								
 Safety glasses with side-shie 								
, , , ,	- Safety gloves (Butyl rubber/Latex/Neoprene/PVA/Viton/Nitrile rubber)							
If risk of overexposure exists;								
- Respirator (see SDS, section 8)								
First aid supplies/equipment (i.e., safety shower, eyewash station)								
First aid training								
Evacuation plan, emergency plan and	equipment required.							
Other controls (specify)								
Outcomes				Action require				
I I BISKS NOT SIGNITICANT NOW AND NOT LIKELY TO INCREASE					check adequacy of controls and whether any exposure routes are at risk)			
Risks significant but effectively controlled at the moment				□ No				
Risks significant and not adequately controlled at the moment								
Uncertain about risks; more detailed assessment required								
Carried Out By:								
Print Name: Robert Anderson	Signature:		A	A.	D	ate:	10/03/2025	
Drint Name								
Print Name:								
Print Name: Robert Anderson	Signature:			A.	D	ate:	10/03/2025

Hazardous Chemical Risk Assessment Form

Likelihood	Criteria
Rare - 1	The event may occur only in exceptional circumstances
Unlikely - 2	Could occur at some time / the event is not expected to occur
Moderate -3	The event may occur
Likely -4	Likely to occur at some time / the event will probably occur
Almost Certain - 5	Has or likely to occur weekly.

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

	consequence					
		1	2	3	4	5
		Insign.	Minor	Mod.	Major	Extreme
	1 Rare	1	2	з	4	5
Likelihood	2 Unlikely	2	4	6	8	10
	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

Risk Levels

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project

Hierarchy of Controls					
Eliminate	Can we eliminate or remove the hazard completely?				
Substitute	Can we substitute the hazard with something else less dangerous?				
Engineer / Isolation	Can we re-design or isolate the hazard completely?				
Administration	What controls can we put in place, e.g., training, job rotation, supervision?				
PPE	What personal protective equipment is required to undertake this activity?
