

## Hazardous Chemical Risk Assessment Form

	\\\/\_\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\		DII - A	1			
Hazardous Chemical:	White Knights Squirts Satin Black Aerosol						
How Used:	Applied from an aerosol spray						
Location (Used):	Throughout Site Used By:			Used By:		22/	(09/2027
Frequency / duration of use:	Monthly - <15 mins in total Quantities used:						
	Toxic				rgic- type skin or respiratory reaction)		
Nature of Hazard:	Corrosive Harmful			Carcinogenic (cand Mutagenic (mutat		s chan	go)
Nature от наzаги:	☐ Harmiui ☐ Irritant			eratogenic (mutat		Crian	ge)
	Other hazard/s (s	specify):		eratogerne (bir tir	derects		
		. ,,					
Monitoring			Coul	d cause injury to/	or via:		
Health surveillance is required?	☐ Yes	□ No	$\boxtimes$	Eyes			Skin
				Inhalation	☐ Ingestion		
Air monitoring program required?	☐ Yes	□ No		Injection			Swallowing
What Control Measures Are in Plac	ce or Proposed				Prese	ent	Recommended
Isolation							
Fume cupboard							
General ventilation							
Natural ventilation							
Other engineering controls							
Safe work methods (e.g., pumping inst	ead of pouring)						
Reduce quantity and/or concentration	(see SDS, section 8)						$\boxtimes$
Information (at least SDS and label)							
Ongoing training (hazards, safe use, PF	PE, health surveillance if	applicable)	)				
Personal protective equipment (list):							
- Safety glasses with side-shie	lds/Chemical goggles						
- Safety gloves (butyl rubber/nitrile rubber/chloroprene)							
If risk of overexposure exists:							
- Respirator (see SDS, section	8)						
First aid supplies/equipment (e.g., safe	ety shower, eyewash sta	tion)					
First aid training	<u> </u>	-					
Evacuation plan, emergency plan and	equipment required.						
Other controls (specify)							
						1	
Outcomes				Action require	ed to <u>reduce</u>	ri <u>sks:</u>	
Risks not significant now and no	t likely to increase						whether any exposure
	•			routes are at			
Risks significant but effectively controlled at the moment  No			☐ No	L Y	es (sp	ecity):	
Risks significant and not adequa							
Uncertain about risks; more deta	ailed assessment require	ed					
Carried Out By:			1

## Hazardous Chemical Risk Assessment Form

Likelihood	Criteria			
Rare - 1	The event may occur only in exceptional circumstances			
Unlikely - 2	Could occur at some time / the event is not expected to occur			
Moderate -3	The event may occur			
Likely -4	Likely to occur at some time / the event will probably occur			
Almost Certain - 5	Has or likely to occur weekly.			

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

		1	2	3	4	5
		Insign.	Minor	Mod.	Major	Extreme
	1 Rare	1	2	3	4	5
po	2 Unlikely	2	4	6	8	10
Likelihood	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

## Risk Levels

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls				
Eliminate	Can we eliminate or remove the hazard completely?			
Substitute	Can we substitute the hazard with something else less dangerous?			
Engineer / Isolation	Can we re-design or isolate the hazard completely?			
Administration	What controls can we put in place, e.g., training, job rotation, supervision?			
PPE	What personal protective equipment is required to undertake this activity?
