

Hazardous Chemical Risk Assessment Form

Hazardous Chemical:	Zinc Guard Galvanising	Coating			
How Used:	Application is by spray atomisation from a hand held aerosol pack				
Location (Used):	Duct Install				/12/2027
Frequency / duration of use:	<2 hrs/day	озеа ву.			<u> </u>
rrequeriey / duration or use.	Toxic Sensitiser (allergic- type skin or respiratory reaction)				
	Corrosive		Carcinogenic (cancer		, ,
Nature of Hazard:	Harmful		Mutagenic (mutation		
			Teratogenic (birth de osol, pressurised cor		
Monitoring	, , , ,		ld cause injury to/c		
		_ 🗆	Eyes	or via. ⊠	Skin
Health surveillance is required?	Yes	□ No ⊠	Inhalation		Ingestion
Air monitoring program required?	Yes	□ No ⊠	Injection		Swallowing
What Control Measures Are in Place	or Proposed			Present	Recommended
Isolation (see SDS, section 7)					
Fume cupboard					
General ventilation					
Natural ventilation					
Other engineering controls					
Safe work methods (e.g., pumping instea	d of pouring)				
Reduce quantity and/or concentration					
Information (at least SDS and label)				\boxtimes	\boxtimes
Ongoing training (hazards, safe use, PPE	health surveillance if applicat	ole)			
Personal protective equipment (list):					
When handling small quantities:					
- Safety glasses with side shield	ls/Chemical goggles				
For potentially moderate exposures:	1_				
- Safety glasses with side shields - General protective gloves (e.g., lightweight rubber gloves)					
· · · · · · · · · · · · · · · · · · ·	sure exists) (see SDS for reco	mmended type)		_	_
- Skin cleansing cream.					
For potentially heavy exposures:					
- All of the above					
- Safety Boots	-l			П	<u></u> ✓
First aid supplies/equipment (e.g., safety	snower, eyewasn unit)				
First aid training					
Evacuation plan, emergency plan and ed	uipment required.				
Other controls (specify) Outcomes			Action require	d to reduce risks	
_					I whether any exposure
Risks not significant now and I	ot likely to increase		routes are at r		
☐ Risks significant but effectively controlled at the moment ☐ No			Yes (s	pecify):	
Risks significant and not adequately controlled at the moment					
Uncertain about risks; more detailed assessment required					
Carried Out By:

Hazardous Chemical Risk Assessment Form

Likelihood	Criteria		
Rare - 1	The event may occur only in exceptional circumstances		
Unlikely - 2	Could occur at some time / the event is not expected to occur		
Moderate -3	The event may occur		
Likely -4	Likely to occur at some time / the event will probably occur		
Almost Certain - 5	Has or likely to occur weekly.		

Consequence	Safety	Environment
Insignificant – 1	No medical treatment other than first aid required and no lost time injury.	No lasting detrimental effect on the environment. Insignificant damage less than \$1000
Minor – 2	Medically treated injury.	Short term, local detrimental effect on the environment or social impact. Plant, property, or equipment damage less than \$10,000 and no disruption to business
Moderate - 3	Lost time injury without being admitted to a hospital.	Serious environmental event (discharge of pollution) requires remedial action. Breach of environmental law. No long-term impact on environment. Plant, property, or equipment damage less than \$100,000 and minimal disruption to business
Major - 4	Lost time injury resulting in being admitted to hospital with the ability to return to work after treatments.	Any of the above, with the potential for long-term environmental or social impact. Plant, property, or equipment damage less than \$1,000,000, major disruption to business
Extreme - 5	Fatality, permanent disability or multiple serious injuries to staff, contractors or public.	Extensive and long-term impacts on the environment and community. Plant, property, or equipment damage more than \$1,000,000, major disruption to business i.e., sites shut down

Consequence

		1 Insign.	2 Minor	3 Mod.	4 Major	5 Extreme
Likelihood	1 Rare	1	2	3	4	5
	2 Unlikely	2	4	6	8	10
	3 Moderate	3	6	9	12	15
	4 Likely	4	8	12	16	20
	5 Almost certain	5	10	15	20	25

Risk Levels

Low (1-3)	Medium (4 – 8)	High (9 – 14)	Extreme (15 – 20)
Works shall be monitored by supervisor. Any risk assessed as presenting a low risk level will be permitted to be controlled using a combination of controls as appropriate, more than one lower-level control must be applied if elimination and or engineering controls are not practicable	Works shall be monitored by senior management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise approved by Senior Management. Any risk assessed as presenting high or medium risk level will only be allowed to be controlled using a combination of at least one engineering control and one lower-level controls as appropriate	No works to commence unless otherwise authorised by the Director. Any risk assessed presenting extreme risk level will only be allowed to be controlled using elimination and or engineering controls as the primary source of controls. The activity MUST be signed off by director or project manager before proceeding

Hierarchy of Controls				
Eliminate	Can we eliminate or remove the hazard completely?			
Substitute	Can we substitute the hazard with something else less dangerous?			
Engineer / Isolation	Can we re-design or isolate the hazard completely?			
Administration	What controls can we put in place, e.g., training, job rotation, supervision?			
PPE	What personal protective equipment is required to undertake this activity?
